

Account of monetary policy 2013

Figure 1.1. Development of inflation

Annual percentage change

Note. The CPIF is the CPI with a fixed mortgage rate.

Source: Statistics Sweden

Figure 1.2. GDP in Sweden

Annual percentage change

Figure 1.3. GDP growth, outcome and forecasts

Annual percentage change

Note. The yellow and blue lines represent the Riksbank's forecasts 2011-2012. The marks show the starting point of each forecast and may therefore deviate from the latest outcome at that point in time.

Sources: Statistics Sweden and the Riksbank

Figure 1.4. CPIF, outcome and forecast

Annual percentage change

Note. See note to Figure 1:3. The CPIF is the CPI with a fixed mortgage rate.

Sources: Statistics Sweden and the Riksbank

Figure 1.5. GDP

Quarterly changes in per cent calculated in annualised terms, seasonally-adjusted data

Figure 1.6. Forecasts 2012-2013 for GDP growth in 2013

Annual percentage change, annual averages

Note. Other analysts refers to the Swedish Ministry of Finance, HUI Research AB, the National Institute of Economic Research, the Swedish Trade Union Confederation (LO), Nordea, SEB, Svenska Handelsbanken, the Confederation of Swedish Enterprise and Swedbank.

Sources: Respective analysts, Statistics Sweden and the Riksbank

Figure 1.7. Forecasts 2012-2013 for CPIX inflation in 2013

Annual percentage change, annual averages

Note. Other analysts refers to those specified in Figure 1:6 except HUI research AB. The CPIX is the CPI with a fixed mortgage rate.

Sources: Respective analysts, Statistics Sweden and the Riksbank

Figure 1.9. Household debt

Per cent of disposable income

Figure 1.10. Schematic outline of a monetary policy conceptual framework without consideration of financial imbalances

Figure 1.11. Real housing prices in different countries

Index, 1996 quarter 1 = 100

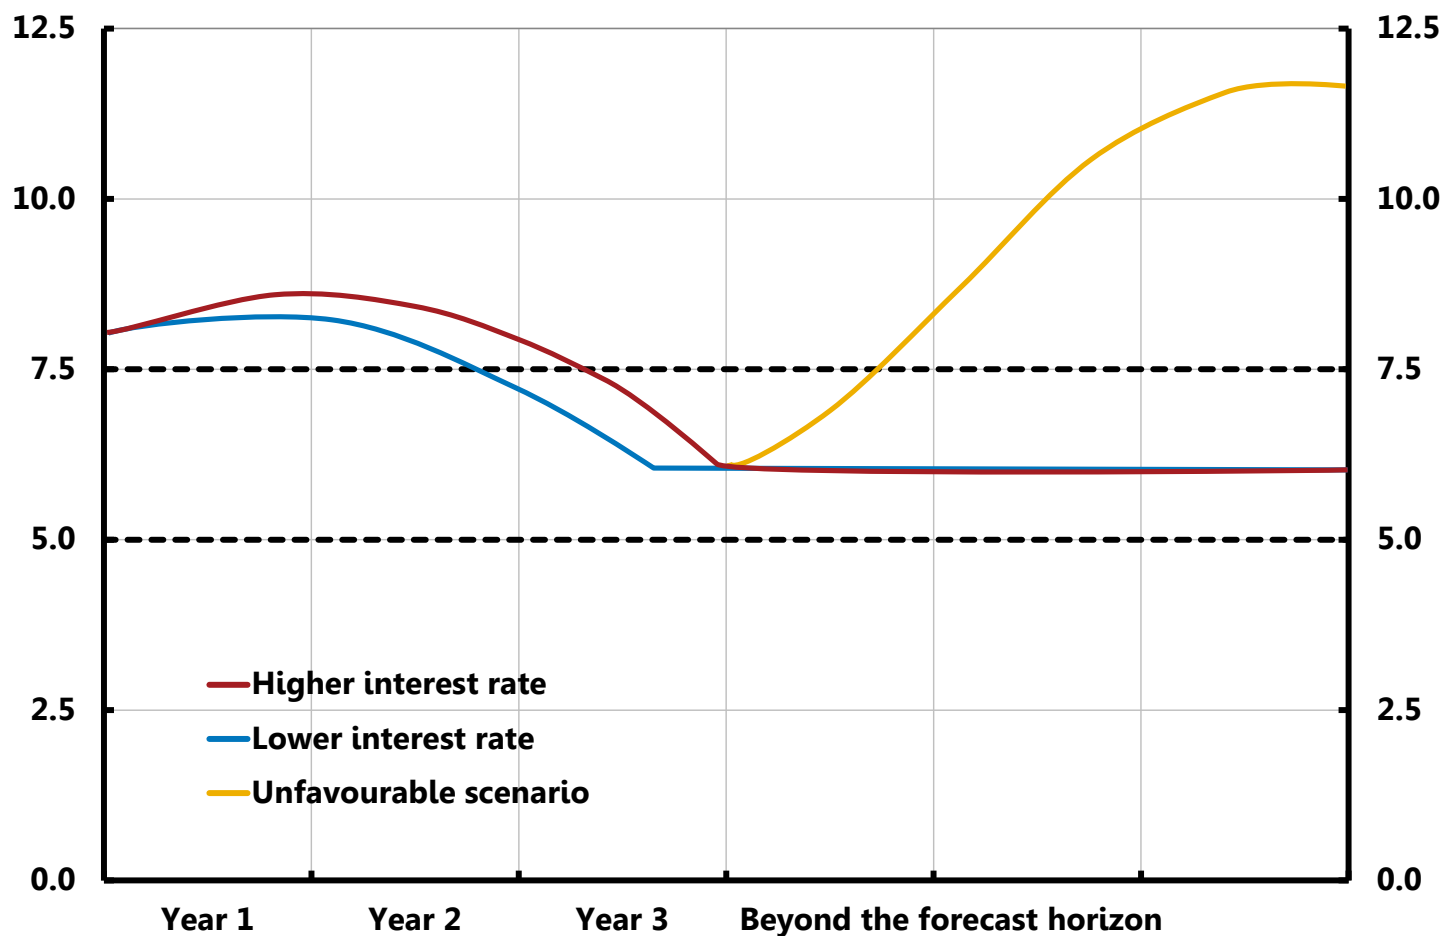

Note. Real housing prices are defined as nominal prices deflated by the CPI.

Sources: National sources

Figure 1.12. Unemployment with a higher and lower repo-rate path and the risk of an unfavourable scenario beyond the forecast horizon

Per cent

Note. The broken lines show the Riksbank's interval, 5-7.5 per cent, for long-term unemployment.

Source: The Riksbank

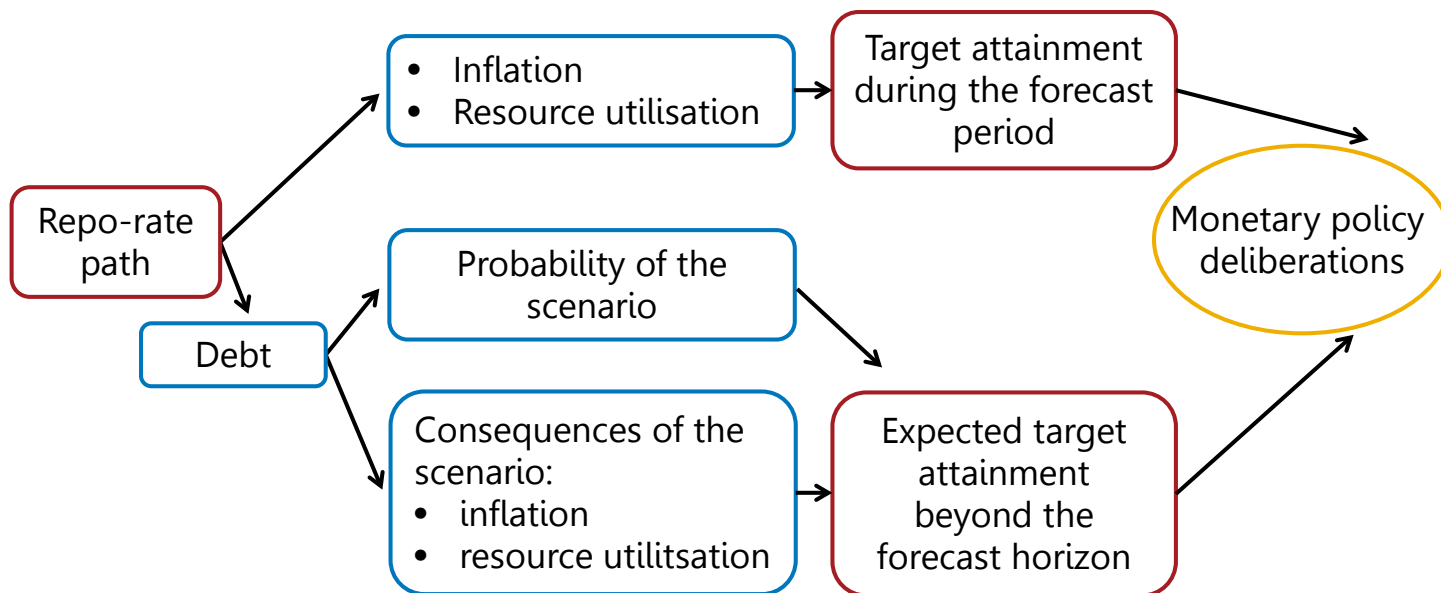

Figure 2.1. Development of inflation

Annual percentage change

Note. The CPIF is the CPI with a fixed mortgage rate.

Source: Statistics Sweden

Figure 2.2. GDP in Sweden

Annual percentage change

Figure 2.3. Labour force, employment and unemployment

Per cent of the population and per cent of the labour force, aged 15-74, seasonally-adjusted data, three-month moving averages

Figure 2.4. GDP and hours gap

Per cent

Note. GDP gap refers to the deviation from trend in GDP calculated using a production function. The hours gap refers to the deviation in the number of hours worked from the Riksbank's assessed trend. The broken lines represent the Riksbank's forecast from February 2014.

Sources: Statistics Sweden and the Riksbank

Figure 2.5. RU indicator

Standard deviation

Note. The RU indicator is normalised so that the mean value is 0 and the standard deviation is 1.

Sources: Statistics Sweden and the Riksbank

Figure 2.6. CPIF, outcome and forecasts

Annual percentage change

Note. The yellow and blue lines represent the Riksbank's forecasts 2011-2012. The marks show the starting point of each forecast and may therefore deviate from the latest outcome at that point in time. The CPIF is the CPI with a fixed mortgage rate.

Sources: Statistics Sweden and the Riksbank

Figure 2.7. CPI, outcome and forecasts

Annual percentage change

Note. The yellow and blue lines represent the Riksbank's forecasts 2011-2012. The marks show the starting point of each forecast and may therefore deviate from the latest outcome at that point in time.

Prospera

Figure 2.19. KIX-weighted GDP and global export prices

Annual percentage change

Note. Global export prices are an aggregate of export deflators (in local currencies), where Sweden's import shares are used as weights. KIX is an aggregate of countries that are important for Sweden's international transactions. Sources: National sources and the Riksbank

Figure 2.20. Nominal exchange rate and import prices

Annual percentage change

Note. Import prices refer to consumer goods prices according to the producer price index. KIX is an aggregate of countries that are important for Sweden's international transactions. Sources: Statistics Sweden and the Riksbank

Figure 2.21. Unit labour cost and import prices

Annual percentage change

Note. Import prices refer to prices on consumer goods according to the producer price index.

Sources: Statistics Sweden and the Riksbank

Figure 2.22. Unit labour cost and CPIF

Annual percentage change

Note. The trend is calculated using a so-called HP filter and refers to the trend in the Riksbank's forecast in February 2014.

Sources: Statistics Sweden and the Riksbank

Figure 2.23. Unit labour cost, outcome and forecasts

Annual percentage change

Note. The yellow and blue lines represent the Riksbank's forecasts 2011-2012. The marks show the starting point of each forecast and may therefore deviate from the latest outcome at that point in time.

Sources: Statistics Sweden and the Riksbank

Figure 2.24. CPIF, outcome and forecasts

Annual percentage change

Note. See the note to Figure 2:23. The CPIF is the CPI with a fixed mortgage rate.

Sources: Statistics Sweden and the Riksbank

Figure 2.25. Outcome and projections for CPIF excluding energy

Annual percentage change

Figure 2.26. Factors behind pricing in the twelve months ahead

Weighted net percentages

Note. The columns show the relative percentages (net) for five factors that companies state will affect prices upwards or downwards 12 months ahead. The first column for each factor refers to the survey in September 2010 and the final one to the survey in September 2013. The surveys made in 2013 are marked in red.

Figure 3.1. GDP, forecasts 2013

Quarterly changes in per cent calculated in annualised terms, seasonally-adjusted data

Figure 4.2. Accuracy of the forecasts of various forecasters for CPIF inflation 2008-2013

Note. See Figure 4:1 for an explanation of the abbreviations. See footnote 34 and 35 for information on the data on which the Figure is based. The CPIF is the CPI with a fixed mortgage rate.

Sources: Respective analysts and the Riksbank

Figure 4.3. Accuracy of the forecasts of various forecasters for GDP growth 2007-2013

Note. See Figure 4:1 for an explanation of the abbreviations. See footnote 34 and 35 for information on the data on which the Figure is based.

Sources: Respective analysts and the Riksbank

Figure 4.4. Accuracy of the forecasts of various forecasters for unemployment 2007-2013

Note. See Figure 4:1 for an explanation of the abbreviations. See footnote 34 and 35 for information on the data on which the Figure is based.

Sources: Respective analysts and the Riksbank

Figure 4.5. Accuracy of the forecasts of various forecasters for the year-end repo rate 2007-2013

Note. See Figure 4:1 for an explanation of the abbreviations. See footnotes 34 and 35 for information on the data on which the Figure is based. MarkEx = Market expectations are calculated on the basis of forward rates using interest rates on derivative contracts (RIBA and FRA), adjusted for average risk premiums corresponding to one basis point per month of the maturity period. Prior to 2007, the Riksbank did not publish forecasts for the repo rate. The Riksbank's quarterly forecasts have been estimated to daily values to produce a value at the end of the year.

Sources: Respective analysts and the Riksbank

Table 2:1. Comparison of different inflation measures

Annual percentage change, annual average

	2011	2012	2013
CPI	3.0	0.9	0.0
CPIF	1.4	1.0	0.9
CPIF excluding energy	1.0	1.0	1.1

Table 2:2. Production and measures of employment 2011–2013

Annual percentage change, annual average

	2011	2012	2013
GDP	2.9	0.9	1.5
No. of employed, 15–74 years	2.3	0.6	1.1
Number of hours worked	2.0	-0.2	0.3
Unemployment, 15–74 years	7.8	8.0	8.0

Table 4:1. Annual rating of the Riksbank's forecasts 2007-2013

	GDP	Unemployment	CPI	CPIF	Repo rate
2007	1	5	5	-	4
2008	4	2	4	6	5
2009	4	6	10	8	6
2010	3	6	5	3	2
2011	3	5	6	4	4
2012	4	7	7	5	5
2013	4	5	8	8	6
2007–2013	3	3	10	5	6

Note. The figures in the table give the Riksbank's ranking, based on estimated accuracy. The highest ranking is 1. Ten institutions make forecasts of GDP, unemployment and the CPI. Nine make CPIF forecasts and five make forecasts of the repo rate. The assessment of the repo rate forecasts also includes market expectations according to market pricing, based on forward rates. These forward rates are calculated using interest rates on derivative contracts (RIBA and FRA). The forward rates are adjusted for average risk premiums corresponding to one basis point per month of the maturity period.

Table A1. Test of all individually-specific effects being the same (H0) or of there being differences (HA)

P-value less than significance level rejects the null hypothesis

GDP	Unemployment	CPI	CPIF	Repo rate
0.88	0.19	0.87	0.51	0.80

Note. The periods studied are 2007–2013 for GDP, unemployment, the CPI and the repo rate, and 2008–2013 for the CPIF. Some of the forecasts in the period 2008–2009 are for the CPIX rather than the CPIF.

Source:
The Riksbank

Table A2. Test of whether the Riksbank is as good as other forecasters (H0) or significantly better or worse than other forecasters (H1)

P-value less than significance level rejects the null hypothesis

	GDP	Unemployment	CPI	CPIF	Repo rate
FiD	0.25	0.26	0.52	0.93	0.37
HUI	0.31	0.91	0.94		
KI	0.27	0.23	0.68	0.69	0.47
LO	0.95	0.87	0.15	0.68	
Nordea	0.93	0.62	0.51	0.73	
SEB	0.90	0.06*	0.30	0.73	0.13
SHB	0.53	0.35	0.52	0.35	
SN	0.46	0.93	0.63	0.04**	
SWED	0.87	0.45	0.15	0.94	0.39
MarkEx					0.38

Note. The periods studied are 2007–2013 for GDP, unemployment, the CPI and the repo rate, and 2008–2013 for the CPIF. Some of the forecasts in the period 2008–2009 are for the CPIX rather than the CPIF. * denotes that the result is significant at the 10-per cent level. ** denotes that the result is significant at the 5-per cent level. FiD = Ministry of Finance, HUI = HUI Research AB, KI = National Institute of Economic Research, SHB = Svenska Handelsbanken, SN = The Confederation of Swedish Enterprise, SWED = Swedbank and MarkEx = market expectations calculated on the basis of market pricing.
