

Sweden is getting new banknotes and coins

Between 2015 and 2017 Sweden is replacing all its banknotes and coins, apart from the 10-krona. A new 200-krona banknote will be introduced and the 2-krona coin will make a comeback. For a period, both the current and the new banknotes and coins will be in circulation at the same time.

Tilt the banknote to make sure it's genuine

Colour-shifting image

The image gradually changes colour between gold and green when you tilt the banknote. This feature is on all the denominations.

Security strip

The strip contains images that move and change motif between "KR" and a royal crown when you tilt the banknote. This feature is on the 100, 200, 500 and 1 000 denominations.
