

Introduction on monetary policy

Riksdag Committee on Finance 12 November 2015

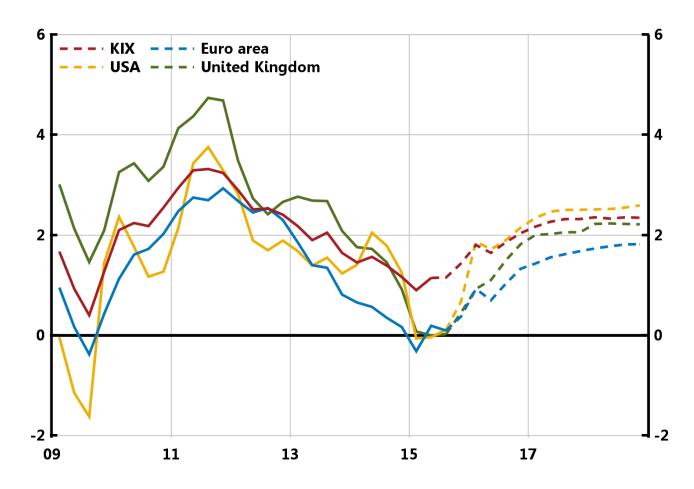

**Governor Stefan Ingves** 

### We must take events in the rest of the world into account

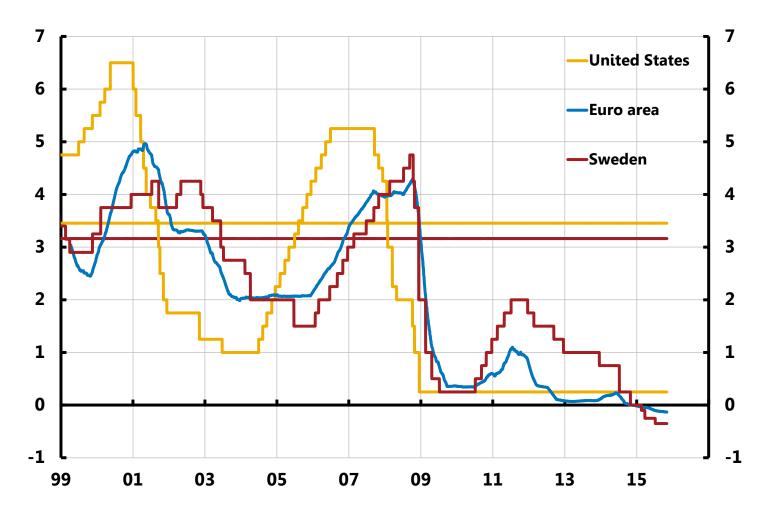

# Weak demand and falling energy prices have led to low inflation abroad

Inflation, annual percentage change. Euro area refers to the HICP and US to the CPI.

Sources: Bureau of Labor Statistics and Eurostat

### Historically very low policy rates both in Sweden and abroad

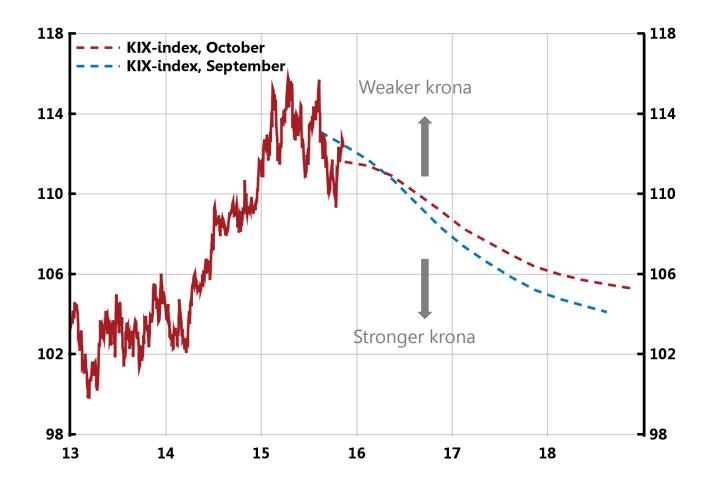

US refers to Fed Fund Rate and Euro area to EONIA. Sweden refers to repo rate. Broken lines are averages 1999-2008.

Sources: Macrobond, the Riksbank

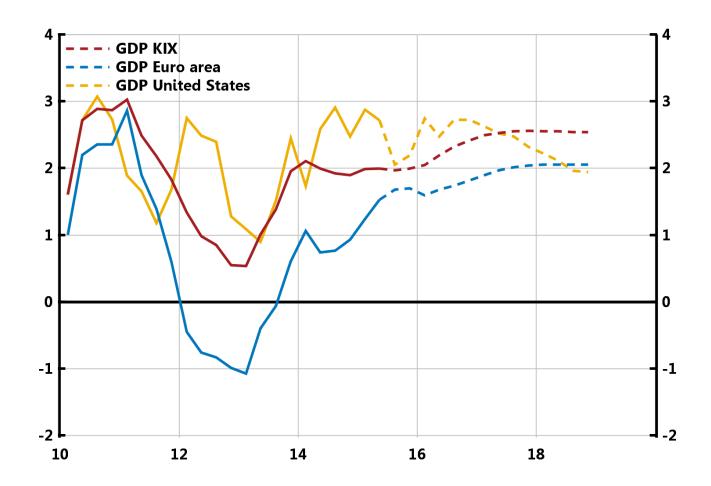

### The krona important for the upturn in inflation in Sweden

Source: The Riksbank

#### Global recovery - question marks regarding emerging market economies

Annual percentage change, seasonally-adjusted data. The KIX is an aggregate of the countries that are important for Sweden's international transactions.

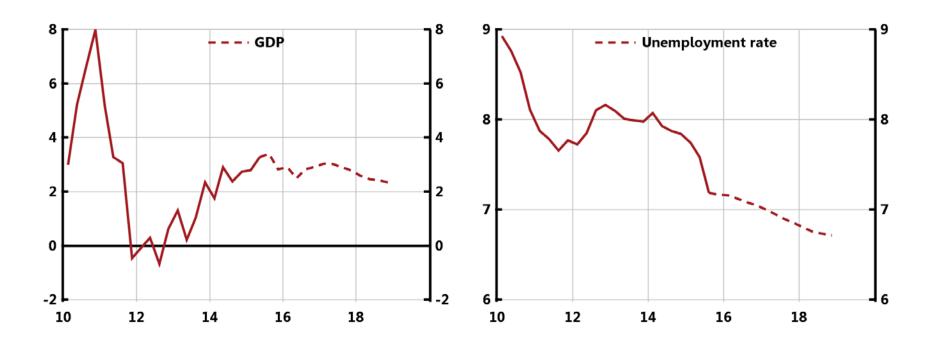

Sources: Bureau of Economic Analysis, Eurostat, national sources and the Riksbank

# Low interest rates are contributing to the strong Swedish economy

**Good GDP growth** 

**Unemployment is falling** 

Annual percentage change and percentage of labour force, 15–74 years, seasonally-adjusted data.

Sources: Statistics Sweden and the Riksbank

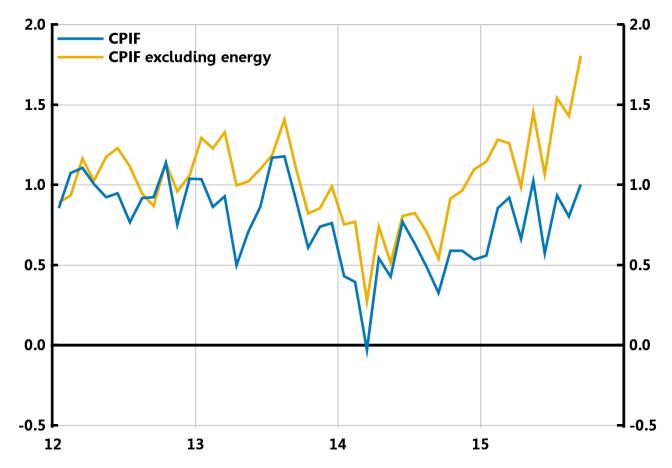

### Effects of the refugee crisis hard to assess

- Sharp increase in people seeking refuge in Europe
- Too early to assess the macroeconomic effects
- Forecasts will gradually have to be adjusted

#### **Clear rise in inflation**

The CPIF is the CPI with a fixed mortgage rate.

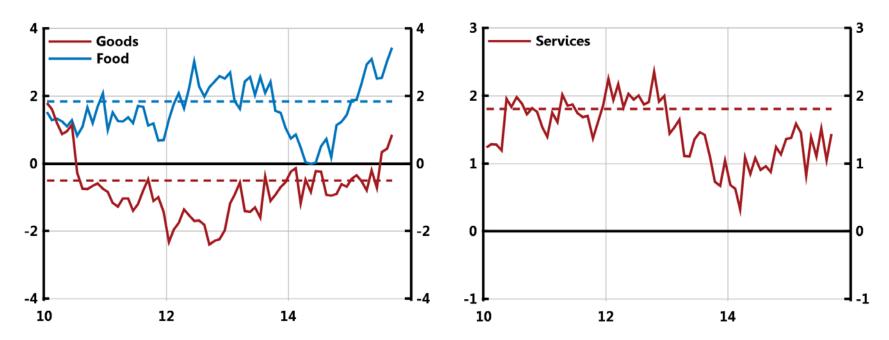

Source: Statistics Sweden

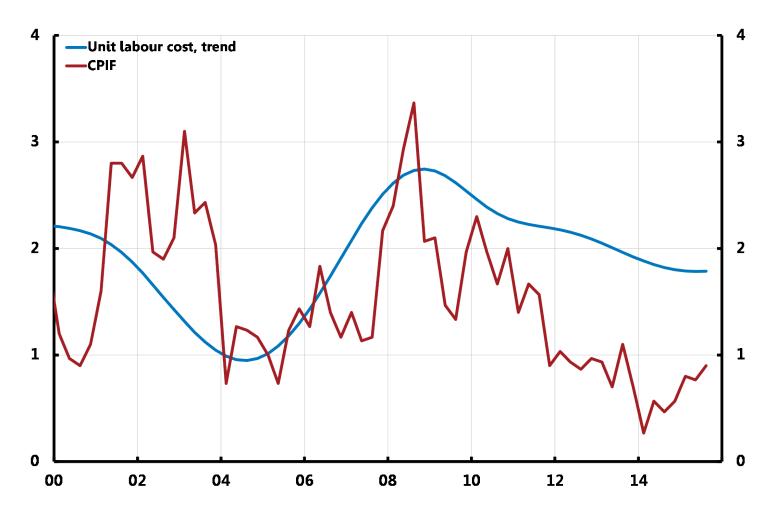

#### The upturn in inflation

### Clear in prices with more import content

#### **Cautious in more domestic prices**

# Higher inflation when companies increase their prices more in line with their costs

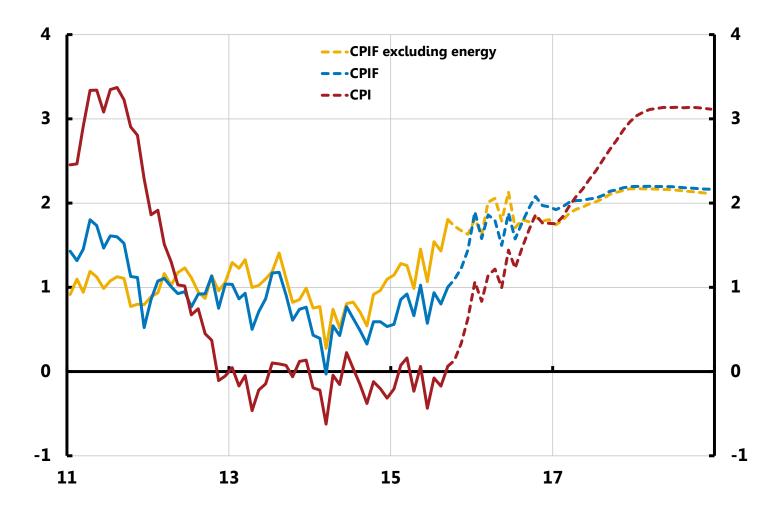

The trend in unit labour costs has been calculated via a so-called HP filter. The trend has been calculated using the Riksbank's forecast from October 2015.

Sources: Statistics Sweden and the Riksbank

#### Inflation rising towards the target

Annual percentage change. The CPIF is the CPI with a fixed mortgage rate.

Sources: Statistics Sweden and the Riksbank

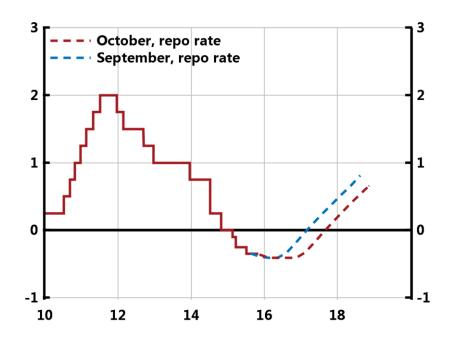

#### So that the positive trend continues

### Extending purchases of government bonds

#### 250 200 200 65 150 135 80-90 100 40 50 10 0 February March April July October **Policy meeting**

#### **Deferring increases**

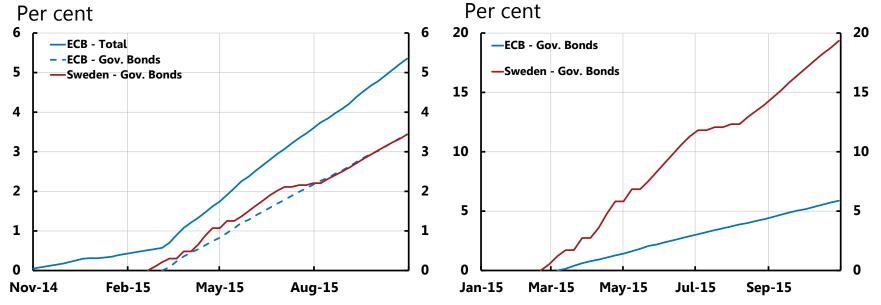

### Purchases of government bonds have increased rapidly in line with the ECB

Share of GDP

### **Continued high level of preparedness**

- Important that the upward trend in inflation continues
- Ready to act even between ordinary meetings
  - Cut the repo rate
  - Buy more securities
  - Intervene on the foreign exchange market
  - Lend to companies via banks

#### The low interest rate is necessary

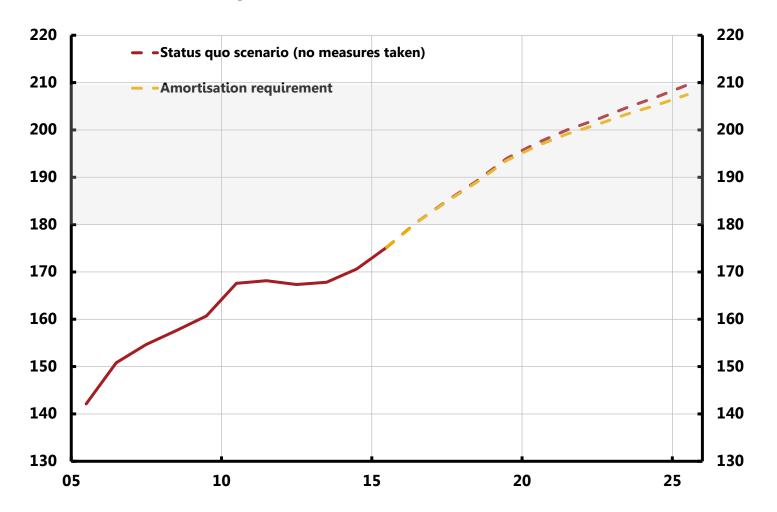

- The inflation target is worth defending
  - Stable expectations have created the conditions for favourable economic development
  - The Riksbank has the task and the tools to influence inflation

#### The risks of low interest rates

- Low level of interest rates in Sweden and abroad can lead to excessive risktaking
- The housing market and high household indebtedness measures urgently required

# High and growing household indebtedness must be managed

Household debt as a percentage of disposable income, per cent

Broken red line shows a possible development over the next 10 years without further measures. Shaded area indicates a feasible lower limit for when the risks are elevated in the economy. Broken yellow line shows the estimated effect of an amortisation requirement. See "Financial Stability Report 2015:2".
